\$1299*

Fun in the dirt. That's what these two bikes are all about. Oh sure, the prices are great, and so is the value. But these bikes aren't about money, they're about fun.

The RT180 is full-sized fun, because it's a full-size bike. With full-size wheels for super trac-

tion, front disc brake for excellent stopping and leading axle front forks and monocross rear suspension for comfortable riding. This bike can kick some dirt.

The RT100 is real big with smaller riders. It's got a low seat that lets you put both feet on the ground. It's got more acceleration

than other bikes its size. It's easy starting and it's got great off-road riding traction.

So look at the prices and think about the fun. It leads you to conclude two things. YAHOOOO and yippeeee.
