CONFIDENCE ON ROAD OR ROUGH COUNTRY— THE YAMAHA DT80MX

www.legends-yamaha-enduros.com

Taking to the trails gives the motorcyclist a unique chance to enjoy the freedom of the countryside, away from the bustle and noise of the cities. With the DT80MX, Yamaha have given that opportunity to even the youngest, most inexperienced riders. All the lessons learned in World Championship motocross have been used to produce an ultra-lightweight that will perform like the thoroughbred it is while still allowing the novice to develop confidence on road or rough country.

Much of this confidence will stem from the race-proven Monocross suspension that gives a firm, comfortable ride on the road while taking the rough in its stride. The progressive suspension action comes from the De Carbon-type single shock absorber with gas/oil damping. A box-section rear sub-frame adds rigidity to the chassis while long travel front forks ensure that the steering is both firm and precise.

The heart of the DT80MX is a free-revving, air-cooled two-stroke single developed from the Yamaha motocrossers of recent years. Its deep cylinder finning helps to keep the operating temperature constant, always allowing the engine to develop its full power potential. This power is delivered smoothly over the whole rev-range thanks to the reed valve Torque Induction System. Prolonged engine life is aided by the use of Autolube:

automatic lubrication that is throttle-linked to deliver a precise quantity of oil according to the engine's needs.

Style has not been sacrificed for all of this technical excellence, however. The motocross-style tank and seat give the DT80MX a mean, purposeful look — a look that is certainly lived up to on the trail. In town the competition styling will set the DT80MX apart from the rest, though its full range of street equipment will be the envy of many out-and-out street bikes. This combination of street style and trail performance, in fact, is what makes Yamaha DT80MX a real winner, whether you want a simple, easily-ridden bike for town use or a totally capable off-road machine.

The instrument panel is a true reflection of Yamaha's policy of attention to detail. Its easy-to-read speedometer is complimented by a full range of warning lights and the whole thing is neatly housed behind the stylish headlamp fairing.

Yamaha's own Monocross suspension and its De Carbon type shock absorber.

The 79cc two-stroke single was developed from the tough world of actual competition and combines outstanding performance with total reliability. The Torque Induction system smoothes out the mid-range power and enhances low-end torque — important factors on the trail or in town. The life of the engine is prolonged by Yamaha's Autolube system which meters the oil feed according to throttle setting. To keep the high-revving engine cool, radial cylinder head finning and a matt-black finish are used.

The 8.0 litre fuel tank helps to give the DT80MX the appearance of a true motocross machine. It blends well with the extended dual seat, which has a height of only 830mm to allow easy control of the machine.

The wide, braced handlebars are padded for extra protection. Their shape gives a comfortable street riding position plus plenty of control on the rough.

The powerful 25W headlamp is built into a sporty fairing that also protects the instrument panel.

Motocross-style leading axle forks allow 160mm of wheel travel. To keep stones and dust away from the fork tubes, rubber gaiters are fitted as standard.

The high-level exhaust system uses a two-stage silencer to keep exhaust noise well within the legal limits. A heat shield protects both rider and passenger against accidental burns.

To protect the engine sump from rock damage the DT80MX has a lightweight steel guard fitted as standard.

Lightweight conical wheel hubs house the Yamaha-designed labyrinth seal drum brakes. Their design makes them completely weatherproof to maintain their full stopping power in the toughest conditions.

DT80MX SPECIFICATIONS

ENGINE

Type 2-stroke, Torque Induction
 Displacement 79 cc
 Bore and stroke 49.0 × 42.0 mm
 Compression ratio 6.3:1
 Max. power (DIN) 7.0 PS
 (9.5 kW) @ 7,500 rpm
 Max. torque (DIN) 9.0 kg-m
 (0.9 Nm) @ 7,000 rpm

Lubrication Autolube
 Carburation VM18
 Ignition CDI
 Starter system Kick
 Fuel tank capacity 8.0 l
 Oil capacity 0.65 l
 Transmission 5-speed
 Final transmission Chain drive

CHASSIS

Overall length 2,025 mm
 Overall width 835 mm
 Overall height 1,130 mm
 Seat height 830 mm
 Wheelbase 1,275 mm
 Ground clearance 255 mm
 Dry weight 84 kg

Suspension

Front Telescopic forks
 Rear Monocross suspension

Brakes

Front Drum
 Rear Drum

Tyres

Front 2.50-21-4PR
 Rear 3.00-18-6PR
