

The great outdoors machine.

Yamaha builds Great Machines for the great outdoors. Take a look at this dependable team. The rugged 100cc Enduro for Dad. The snappy JT2-L Mini Enduro for Junior. They're both better machines. Get 'em together and get away to it all.

Yamaha builds camping gear that gets you where you want to go. Take Dad's LT2 100cc Enduro, for example. It's the lightest Enduro and a perfect "bumpersticker" for the camper. It's got Torque Induction for smoother power. Autolube oil injection to mix oil and gas automatically. Big front brakes for sure stops. Knobby tires for great trail traction. And a 5-speed constant mesh transmission for tough trails and smooth highway speeds.

Like father, like son. The boy's bike is Yamaha's JT2-L Mini Enduro. It's built like the big Enduro, for kids who won't settle for some little putt-putt. It's got Autolube, 4-speed constant mesh transmission, and full 15-inch spoke wheels. Both machines are safety engineered and street legal. If you've got an urge to head for the hills, get up and go to your Yamaha dealer.

YAMAHA The great machines for '72.
