AN AMAZING SELECTION

No matter whether you're just beginning your riding career, or you have years of riding experience...you'll find that Yamaha's new selection of motorcycles for the '70s is packed with values and features in every size and class.

Power and performance. Dependability and economy. Safety and comfort. Appearance and handling ease. Each bike is carefully engineered and designed to present the maximum value for even the most particular rider.

Each model's performance has been carefully tailored to match its own engine capabilities and to deliver performance second to none. And, although the actual combination of features varies from model to model, one fact is certain: the rider will receive optimum performance no matter which model he chooses.

There is, of course, a very good reason for the fact that Yamaha is consistently the winner in races around the world. The reason is... experienced racers prefer Yamaha. They know they can always rely on Yamaha power and performance. And what is true on the race tracks is also true on highways, city streets, country roads... or in the roughness off the road terrain. Yamaha power is always working for the rider... starting, dashling, passing... winning!

A multitude of other fine features awaits the Yamaha rider. Some of them you see illustrated on these pages. For instance, Yamaha bikes feature bigger, easier-to-see head and tail lights, tires designed for dependable traction on any surface, superior suspension and steering, extra fuel savings, less engine wear, less depreciation, less maintenance, and higher resale value. And an original price which is attractively low. Add to these the handling ease and eye-catching appearance, which we want you to see for yourself, and you'll have made your decision for Yamaha.

Communication systems

Festina lente. Contrasted measures are needed of *pace* and *pace* themselves. A more rapid movement, faster and more intense, can be given in the first half and in the last half. The extremes of movement become extreme again in the second half. In contrast, a slow, measured and deliberately planned, less frantic pace, can progress more steadily through certain movements, like the *adagio*, the *ritenuto*, the *tempo*, the *ritardando*, and the *tempo*.

Not long ago, on 12/14/00, I received an e-mail from a friend. The entire message was very brief. Yannick had just gone, after a long, unusual, and Yannick's passing gave me some expectation for "normal" or normal death. The message read:

It's a better machine

YAMAHA
STREET

YAMAHA MOTORCYCLES

YAMAHA 50/U5

An economical 50cc bike with plenty of Yamaha big motorcycle engineering. The fine performance of the 2-stroke engine, the superb Autolube system, plus many other features for safety and comfort. Perfect for beginners, young and old.

YAMAHA 75/U7

The ideal model for a safe and economical motorcycling career. Easy to ride. Fine performance from the 2-stroke Rotary Valve single engine with automatic clutch and 3-speed transmission. Yamaha's exclusive Autolube injection system.

YAMAHA 50/F5

Top in satisfaction. Both performance and durability are engineered in the fine Yamaha tradition. Rugged 4-speed transmission. Exclusive autolube convenience. Extra-smooth riding for the ultimate in comfort. Fade-free brakes. And big bike styling.

YAMAHA 50/FS1

The new winner in the 50cc class. 5-speed transmission for all the pleasure of big-bike cruising. Economies of 50cc engineering plus the comfort and racing design of much larger models. Such racing features as set-back seat, upswept muffler and attractive paint finish. Plus Yamaha's world-famous Autolube injection system.

YAMAHA 80/G1F(D)

Whether your cycling is city, country, or both, this model will bring all the thrills of cruising on the bigger machines. Yamaha's exclusive Autolube automatic lubrication system and powerful 2-stroke Rotary Valve engine. Smooth 4-speed transmission. Designed for comfort.

YAMAHA 100/L2

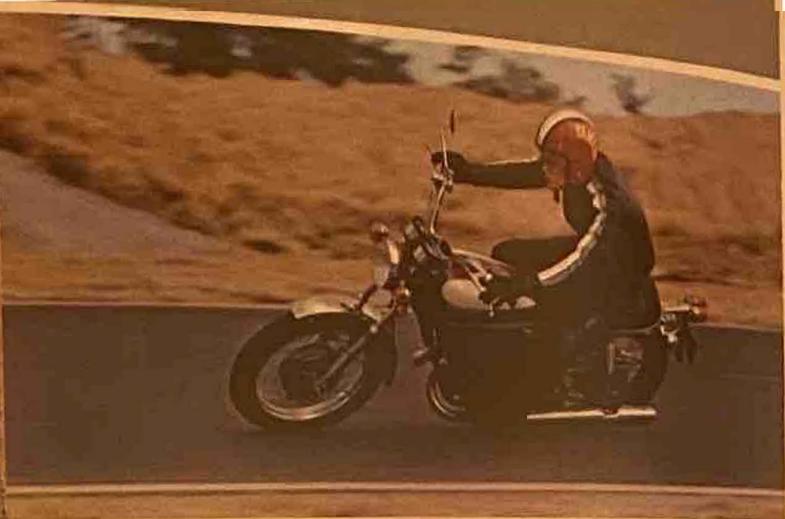

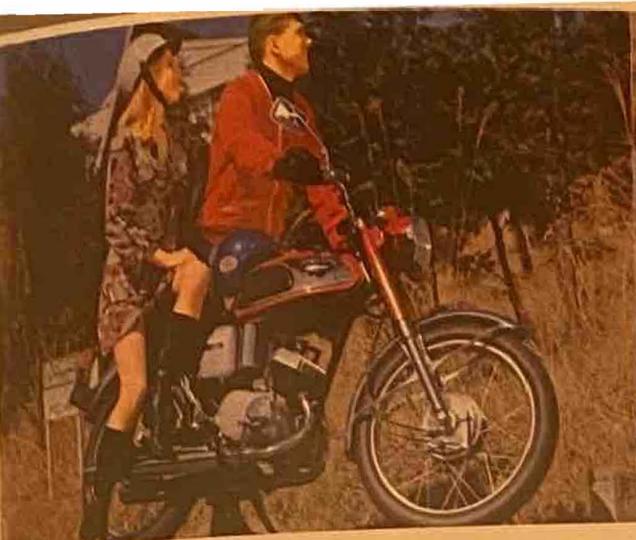

A practical bike that's tops for smooth, steady and reliable performance under all conditions. New and improved Rotary Valve single engine. Easy, 4-speed shifting. Exclusive Autolube injection system reduces engine wear. Primary kick starter. Ideal for business or pleasure. Economical operation. Perfect medium-size bike.

YAMAHA 125/A7

Sleek styling and advanced engineering are here combined to bring perfect cruising pleasure and unparalleled performance. Rotary Valve engine delivers full power under all conditions. Economical operation with Autolube convenience. A real winner.

www.legend-yamaha-enduros.com

TWIN

YAMAHA 100/L1

The first twin-cylinder, twin-carburetor engine in the 100cc class. Streamlined styling. Twin exhausts. 4-speed transmission and Yamaha's proven Autolube oil injection system. Electric starter optional.

YAMAHA 250/DSS

Super scavenging Parallel Twin engine delivers a big increase in power and performance. 2-stroke, 5-port engine for extra acceleration and power to spare. Exclusive Autolube oil injection. Perfectly-meshed transmission. Separate speedometer and tachometer.

YAMAHA 125/ASI

New, high-performance Twin Parallel engine for quick action. New 5-speed transmission and Diamond-type tubular frame. 5-port scavenging increase. Big brakes and bigger light make this machine a born champion.

YAMAHA 350/RS

Another astonishing performer on tracks around the world. Super scavenging 5-port parallel twin engine includes all the technology that makes Yamaha a consistent winner. Extra power and performance efficiency on both street and track. 5-speed gearbox perfectly meshed for shifting ease. Primary kick starting. Exclusive Autolube lubrication.

YAMAHA 180/CS2E

An ultra-exciting combination of big bike power, amazing acceleration and superb handling. 5-port Parallel Twin engine gives superlative response. 5-speed constant-mesh transmission for handling ease. Speeds up to 90 km/h. Perfect maneuverability.

YAMAHA TRAIL

www.legend-yamaha-enduros.com

YAMAHA 90 TRAIL/HT1

A super-lightweight performer designed and engineered for rough trail work or for outstanding street performance. Powerful 5-port engine adds amazing performance, with savings in fuel of up to 10%. Bridge-type handlebar. 3-step adjustable rear shocks. Primary kick starting. Yamaha exclusive Autolube.

YAMAHA 175 TRAIL/CT1

175 cc of power to take you over any terrain with ease. 5-port single engine for dynamic power. Sturdy front forks designed to absorb the toughest punishment. Yamaha's proven Autolube injection system. Other special features include adjustable rear shock absorbers and separate speedometer and tachometer.

YAMAHA 125 TRAIL/AT1

A new 125 for the roughest country. 5-port single engine for remarkable performance. Special front forks absorb the roughest terrain. Adjustable rear shock absorbers. Separate speedometer and tachometer. Exclusive Yamaha Autolube injection system.

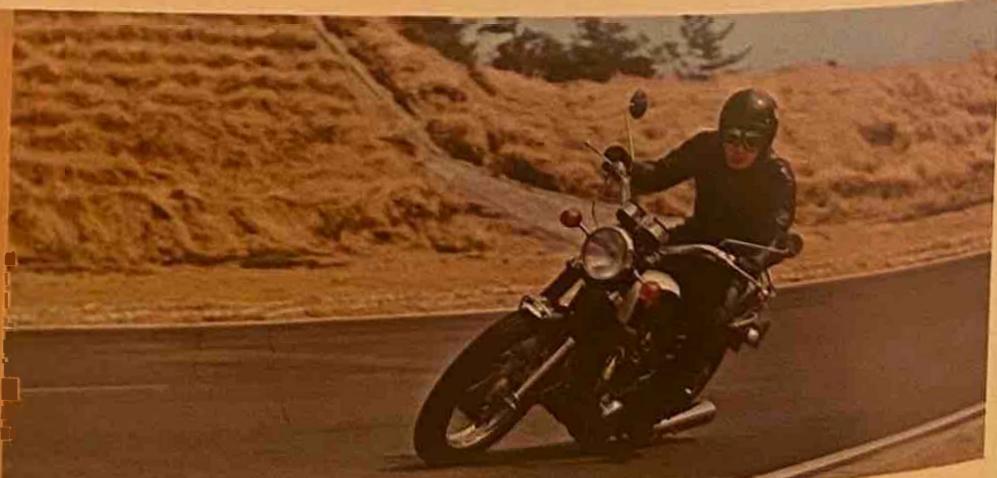

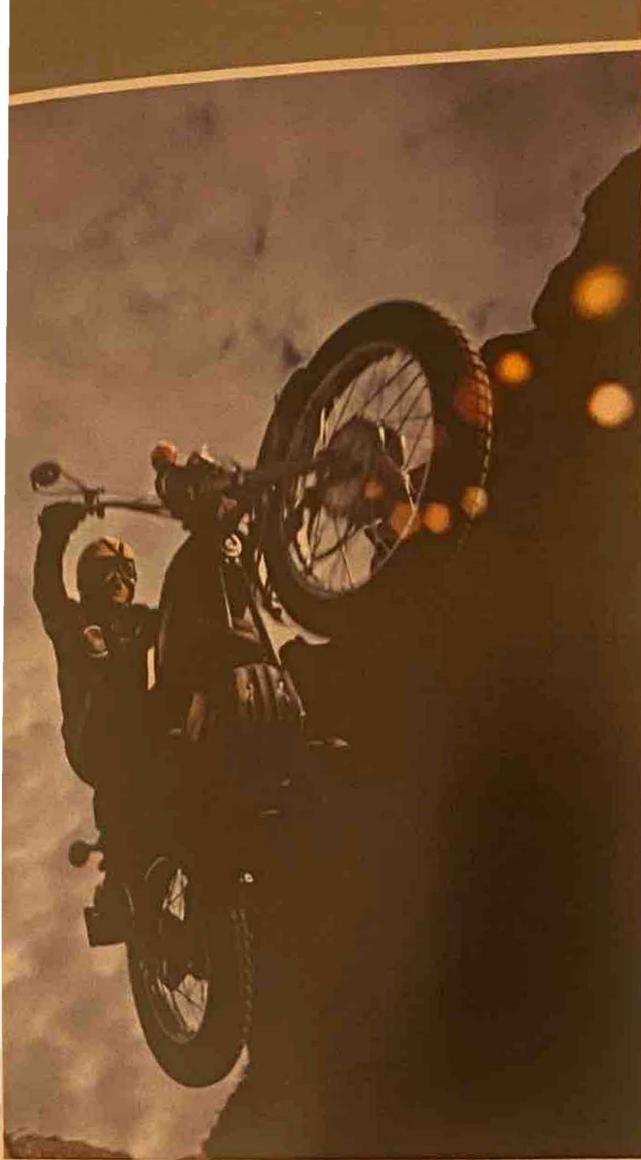

YAMAHA 250 TRAIL/DT1

Engineered especially for expert rough country riders. Extra strong forks. Famous 5-port single engine delivers exciting power. New lapped head and plug for compression release. Adjustable rear shocks. Separate speedometer and tachometer. Exclusive Yamaha injection system.

YAMAHA 650 XS1

Our newest and most exciting machine. A 650 with a surging 4-stroke OHC twin engine. 5-speed transmission perfectly synchronized. Twin 33 mm constant velocity carburetors. These features bring together a combination which simply cannot be bettered. Still it's lightweight, easy to start and economical. A full-flow lubrication system combining forced feeding and spray feeding. A dramatic performer in every way.

YAMAHA

Street Scrambler / Trailmaster

YAMAHA 50 STREET SCRAMBLER/F5C

This fine model is the ideal cycle for rapid, safe and yet exciting travel. With a big 6.8 liter gas tank, this compact powerhouse has all of the exciting features found in each of Yamaha's race-bred champions. Designed to please the most discriminating rider, or give confidence to the most inexperienced, this model features unexcelled performance for its class.

YAMAHA 125 STREET SCRAMBLER/AS2C

Here's an easy-to-handle bike with every feature designed to take the effort out of bike riding, and with added comfort. Easy toe shift. Exclusive Yamaha Autolube injection system. Dust-free, waterproof brakes for extra safety. A real pleasure to ride.

YAMAHA 80 TRAILMASTER/G5T

A rugged model designed to conquer the roughest trails and also give smooth performance on city streets. Double sprocket construction and Rotary Valve single cylinder with the Autolube injection system engine are the secret.

YAMAHA 100 TRAILMASTER/L2CA

The outdoorsman's dream. Built to take all of the tough punishment of trail riding. Long front fork, special engine guard, 'seven-bone' frame design, sturdier springs and a special rear arm to absorb vibration. Special tires for better traction. Two-step changeover Trailmatic transmission system, for fast and easy change from ordinary street-use gears to trail-use gears or vice-versa. Electric starter.

www.legend-yamaha-enduros.com

YAMAHA 360 TRAIL/RT1

A big new machine designed for the roughest trail riding imaginable. Husky 5-port single engine delivers maximum power and efficiency under every condition. Ideal for the fast dash, for city streets, for cross-country highways and for the most rugged off-the-road terrain. Adjustable rear shock absorbers and rugged front forks withstand the roughest punishment. Constant-mesh 5-speed transmission assures smooth riding anywhere. And Yamaha's exclusive Autolube lubrication system...the finest advance in motorcycle engineering in many years. Truly a pacesetting model that will be the pride of every motorcycling enthusiast.
